- [ ] eval hack: document.write(document.cookie)

- [ ] person['lastName'] vs. person.lastName

- [ ] loop through object.keys()

- [ ] review alternatives for declaring:
  functions in objects vs.
  functions in classes vs.
  functions in files vs.
  functions in functions

- [ ] JavaScript Loops:

  for (i = 0; i < 5; i++) { n += i; } // loop over range of int

  for (x in myObject){ s += myObject[x]; } // loop over Object attrs

  for (x of myArray) { s += x } // loop over Array elements

  For(x of string) { s += x } // loop over String characters

  while

  do/while

- [ ] Class can have multiple objects

- [ ] Object is an instance of a class!

- [ ] Class can have multiple objects
